- ★ Scissors
- ★ Hair Clip

Steps

1. Pull the ceramic bead to the base of the metal loop on the threader

2. Take the desired amount of tinsel out of the package
   Tip: More tinsel leads to thicker extensions

3. Fold the tinsel in half to create a loop and pull it through the metal loop of the threader

4. While holding the tinsel loop, push the bead forward on the loop, forcing the loop of tinsel through the bead

5. Fold the loop of tinsel over the bead and tighten it around the bead to secure it

6. Place the bead with the tinsel back on the threader

7. Select 5-10 strands of hair one inch away from the part and clip any hair closer to the part to the other side of your head
8. Put the strand of hair through the threader

9. Pull the bead forward and onto the hair

10. The bead should be half an inch away from the base of the hair strand

11. Take the pliers and clamp the bead tightly to the hair

12. The bead should be tight on the hair

13. Cut the bottom of the tinsel to the desired length

The tinsel should look like this when finished.
